Hi Peter,

Yes, your email along with the revised link will be shared with Council. With respect to the Zoom link for the meeting, it is on the Council agenda: <https://pub-yorbalinda.escribemeetings.com/Meeting.aspx?Id=9337972c-3e73-4a1a-bf24-36f4080f407a&Agenda=Agenda&lang=English>

Regards,

CAROLINA TORRES, MBA, MMC

Assistant City Clerk

Thank you, Carolina.

Please confirm this is entered into the official record for tonight's meeting and the corrected weblink to the indicated documentation github.com/ca-lmad-auditors/yorba-linda-lmad-compliance-audit. Also, please provide me with the Zoom link for this evening's Council meeting public comment that I registered yesterday.

Regards,

Peter Meng

Subject: Written Public Comment - URGENT: Second Notice of Administrative Default & Public Accountability Inquiry (Oct 6 Council Meeting)

Dear Mayor, Members of the City Council, and City Clerk,

Please accept this formal written public comment for the official administrative record of the October 6, 2026, City Council meeting.

It has been exactly 21 days since I addressed this Council via teleconference and submitted a formal, on-the-record public comment detailing the unmitigated wildfire and pipeline hazard on the Chicago Avenue slope (Tract 16043 / Zone L-5A). I provided documented proof that the overgrown pine and pepper tree canopy violates OCFA Guideline B-09 and threatens the structural integrity of the high-pressure utility lines below it.

To date, I have received zero technical response, zero P.E.-stamped rebuttal from the City Engineer, and zero communication from Willdan Financial Services.

As a reminder, on June 16, this Council voted to overrule resident safety protests and approved a \$365,602 sole-source contract to Willdan. In return for those taxpayer dollars, Willdan's corporate servers have explicitly blocked my emails (a documented Mimecast 550 error) when I attempted to serve them with safety data.

For the Council members who are actively campaigning for re-election this November, the residents of Yorba Linda require an answer on the public record tonight: **How can you justify asking this community for another term when your official voting record demonstrates a willingness to fund municipal contractors who block resident safety communications, while you actively ignore unrefuted fire hazards in our neighborhoods?**

True public safety is not discretionary. Maintaining a documented, illegal fuel load to satisfy a private aesthetic preference is a breach of fiduciary duty and exposes Yorba Linda taxpayers to catastrophic, unindemnified liability.

The complete unrefuted engineering record, including the City's failure to respond and the Mimecast block logs, remains permanently archived for public, electoral, and judicial review at: <https://github.com/ca-lmad-auditors/yorba-linda-lmad-compliance-audit>.

I once again formally demand that the City Manager compel Willdan and the Public Works Department to execute the pre-vetted, OCFA-compliant replanting plan to abate this public nuisance immediately.

Respectfully submitted,

Peter Meng, P.E.
