Good afternoon,

Your email has been received.

Regards,

CAROLINA TORRES, MBA, MMC

Assistant City Clerk

Subject: NOTICE OF STRICT LIABILITY: Chicago Ave Pipeline & Fire Hazard (Action Required)

To the City Clerk of Yorba Linda, OCFA Division Chief, and CPUC Safety and Enforcement Division:

Please see the formal engineering and legal hazard assessment regarding the unmitigated continuous fuel load and high-pressure natural gas pipeline threat located on the slope along Chicago Avenue in Yorba Linda, California.

Video Evidence & Notice of Strict Liability:

Permanent Public Record & Abatement Plan:

github.com/ca-lmad-auditors/yorba-linda-lmad-compliance-audit

As detailed in the assessment, this site constitutes an imminent life-safety hazard with active violations of OCFA Fire Prevention Guideline B-09 (Emergency Apparatus Staging & Vertical Clearance). The October 14, 2026 administrative default has officially lapsed.

This communication establishes actual knowledge of the hazard, thereby voiding governmental immunity under CA Government Code § 835. We demand immediate emergency abatement of this public nuisance under CA Health & Safety Code § 13879 to protect the adjacent pre-1980 residential structures and the subterranean pipeline infrastructure governed by CPUC General Order 112-F.

Should municipal authorities continue to default on this public safety mandate, private self-help abatement will proceed under California Civil Code §§ 3495 & 3502.

Respectfully,

LMAD Review
